

Double Chin?

Help Is on the Way!

Call Dr. Dean Kleto

kybella™
 (deoxycholic acid) injection

ARE YOU self-conscious about your “double chin?” Do you wish you could make it go away without Liposuction or surgery? Then KYBELLA™ may be right for you.

Dean Kleto, MD, Board Certified Plastic Surgeon, is one of the first and only practitioners in East Tennessee who will be personally injecting KYBELLA™. KYBELLA™ is the first and only FDA approved prescription non-surgical treatment for adults used to improve the appearance and profile of moderate to severe fat below the chin (submental fat), also called “double chin.”

Submental fullness, or “double chin,” is a common facial cosmetic condition impacting women and men. It can be influenced by aging, genetics, and weight gain. Studies have shown that 68% of

people are frustrated with their “double chin,” and an overwhelming majority of those patients treated with KYBELLA™ reported satisfaction with the appearance of their face and chin.

KYBELLA™ is deoxycholic acid, a naturally-occurring molecule in the body, that when injected into the fat beneath the chin causes the destruction of fat cells. Once destroyed, those fat cells cannot store or accumulate fat, and retreatment is not expected.

During your appointment, Dr. Kleto will customize your KYBELLA™ treatment regimen, including the number of treatments you will need depending on your desired chin profile. You will receive a series of injections at each treatment, which will be spaced one month apart. Visible improvement of your chin profile usually occurs in

two to four treatment sessions. Up to six treatments may be necessary.

Dr. Kleto is currently scheduling appointments for KYBELLA™, so if your “double chin” is a source of frustration for you, then call his office or visit his website. Dr. Kleto has more than 25 years experience in Plastic and Reconstructive Surgery in Knoxville and the surrounding area. He received his training in plastic surgery at Duke University Medical Center. Information on future seminars is coming soon!
